

School Projects in the Peru Jungle

We recently installed ten computers at the Jack Wolff School. The school now has Internet with wireless WIFI. The students are excited about being connected with the rest of the world.

For the past 14 years we have worked to improve the schools with better equipment, copiers, printers and office supplies. Our support has helped develop a good working relationship between friends in Peru and the United States.

The Jack Wolff School has expanded from 200 to 1,000 students since 2004. Next year the government will be rebuilding the school to include 18 classrooms, new bathrooms and a recreation shelter in the courtyard.
